

DESK & WORKSPACE DISPLAYS

Optimise your office space

Booking a workspace in advance is just one part of the reservation process. Now you can make the experience of locating, confirming, releasing and creating ad-hoc bookings complete.

Suitable for desks, collaboration spaces and meeting rooms, our sleek digital device combines a great user experience with powerful utilisation insights.

Coloured lights and clear text show workspace status at a glance, optionally displaying the resource ID or the person that has made the booking.

Book on the spot, confirm an existing booking or extend your reservation in just a few taps, using the intuitive touch screen.

Use contactless RFID technology to verify user identity and book spaces

securely.

Use Microsoft Outlook, Microsoft Teams or your mobile device to make advance bookings from a list or interactive floor plans.

Define a confirmation time window and automatically free resources in the event of a no-show.

Report equipment faults, e.g. a faulty screen or PC docking station.

Create accurate utilisation reports to help plan and optimise your future office space.
